ABSTRACT

The Student Information Questionnaire (SIQ) has been administered at the City College of San Francisco (CCSF) every two years since 1976. This report presents SIQ results for fall 1988 and includes a longitudinal analysis of SIQ data for the previous 12 years. Following a brief historical review of the use and development of the instrument, section I analyzes trends in students' sex, age, ethnicity. educational attainment at U.S. schools, foreign education, educational goal, semester completion difficulties, current occupation, and reasons for choosing CCSF. Section II presents detailed tables of results for the 1988 SIQ, based on responses from 16,316 students. After addressing various methodological issues, this section breaks down student responses to 36 questionnaire items by sex, age, ethnicity, and day/evening attendance. Reported findings include the following: (1) among day students, the goal of transfer to a four-year college was the primary reason for attending CCSF among both men (64.6%) and women (60.3%); (2) more evening students than day students were likely to indicate that they received no foreign education; and (3) among day students, more women (11.3%) than men (10.6%) anticipated difficulty with reading/writing skills. The final section of the report contains complete data tables for sex, age groups, ethnic groups, educational goals, and declared day or evening division, with data grouped for day respondents, evening respondents, and total respondents. A copy of the SIQ is included. (JMC)

Acknowledgements

The Student Information Questionnaire is a major undertaking that requires the cooperation of many people to be successful. Thanks are due to all those who contributed from the initial formulation of questions to the final production of the report.

The task of revising the questionnaire for each administration is a collaborative effort that benefits from comments and suggestions made by Judy Moss, Associate Director of Educational Planning, Coordination and Research SFCCD, Leslie Smith, Coordinator, Review, Research and Planning of the Centers Division, SFCCD and department chairs, college administrators and other City College staff who provided comments on early drafts.

Data Collection was supervised by William Roberts; computer programming required to provide cross tabs of the data was undertaken by Mark Sapiro and Paul Downing of Computer Services, SFCCD; graphics were prepared by Ruben Venegas, Research Assistant, City College Research Office; and production of the report was accomplished by Sam Yee, Duplicating Services, SFCCD.

Any errors or ommissions are the responsibility of the author.

STUDENT INFORMATION QUESTIONNAIRE CITY COLLEGE OF SAN FRANCISCO

Fall 1988 Report

Preface

When reading this City College 1988 Student Information Questionnaire (SIQ) report or any other summary of SIQ results, keep in mind that the summaries refer to **respondents**—not to the population of students for any given year. The adequacy of respondents as proxies for the total population depends on how representative they are of that population. Although this is not a scientifically drawn sample that would allow calculation of measurement error for each question, data collection at the time of registration results in samples with characteristics very close to the population of students. This is clearly the case with the 1988 respondent group.

Comparisons of responses from one SIQ administration to another are affected by differing response rates, by wording, and placement changes that occur from year to year. This variability (in response rate per question, changes in wording over time, and in the representativeness of respondents per administration) as well as other undetermined factors should make the reader cautious about year to year comparisons. However, given these caveats, the SiQ is a useful tool in providing a general understanding of characteristics and attitudes of the City College student body. The historical record also sheds some light on what the survey designers considered pressing issues in any given even numbered year since 1976 when the survey was first conducted at City College.

I. HISTORICAL PERSPECTIVE

I. HISTORICAL PERSPECTIVE

Background

The Student Information Questionnaire (SIQ) has been administered at City College every two years since 1976.¹ Continuity and flexibility are competing interests whenever a new questionnaire is constructed. Continuity is maintained by a body of core questions that allow comparison over time. However, modifications, additions and deletions are introduced as needs arise. For example, concern over concurrent enrollment with neighboring institutions prompted the inclusion of a specific question in the 1986 questionnaire. Results did not substantiate the concern and the item was dropped in the 1988 SIQ. External influences may also determine word choice and other modifications. New items on the 1988 SIQ were prompted by matriculation legislation mandating information about specific college functions.²

TRENDS: HOW HAVE CITY COLLEGE SIQ RESPONDENTS CHANGED?

The District Fall 1988 Summary³, prepared by Judy Moss, provides percentage distributions for common items between 1972 and 1988 for City College day (see Moss, page 25-29) and evening students (see Moss, page 30-34). Using the historical tables prepared by Moss as a guide, the following trends stand out:

SEX

DAY AND EVENING. According to Moss, female enrollment in City College day classes in 1972 was 42.3%. Contrasted against percentage female enrolled in Fall 1988 day classes (51.6%), this is a gain of a little more than ten percent. In the evening division, female enrollment grew from a bare majority in 1972 of 51% to 58.7% in 1988.

AGE

Changes in the age categories used over the past 9 administrations make comparisons in the age distribution of respondents somewhat problematic. However, it is possible to collapse categories into three common groupings to permit comparisons over this period. In doing so, we find that both day respondents and evening respondents are older in 1988 than they were in 1972.

³Moss, Judith Student Information Questionnaire: A Survey of Student Characteristics (Fall 1988 District Summary).

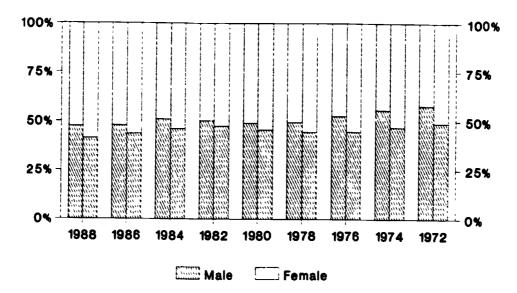

8

•

¹ References by Moss to student characteristics prior to 1976 are taken from enrollment records. Recall that the SIQ was first administered at CCSF in 1976. See footnote 3.

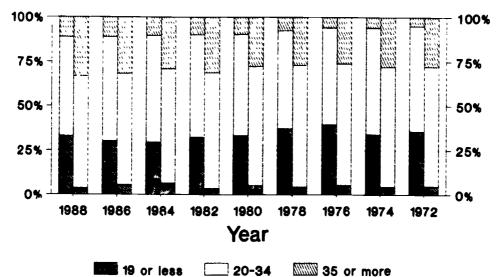

²Using the 1988 SiQ as a reference point, the chart at the end of this historical section provides a backward glance at question continuity over this period.

•Figures prior to 1976 are taken from •Student files.

__ 20-34

AGE EXTREMES: DAY. Since 1976, growth has occurred in each of the four oldest age groups except the very oldest. Percentage representation of day respondents 35-44 years of age, grew from 3.8% to 6.9% in 1988. Day respondents 45-54 years of age grew from 1.3% to 2.4%. Those in the category 55-64 years of age doubled from .5% to 1.1%. Overall, respondents 35 and older have almost doubled in the day division (from 5.8% in 1976 to 11.3% in 1988).

Youthfulness peaked in 1976 when 39.4% of the day respondents were teenagers. This figure has dropped to 37.9% in the Fall of 1988. Although their percentage distribution has dropped since 1972 (59.4%), the majority of day respondents are still represented by those between the ages of 20 and 34 (55.8% in 1988).

AGE EXTREMES: EVENING. As the graph clearly indicates, the weight of the age extremes is the reverse of that discussed for the day division. The evening respondents are consistently older than the day respondents over the 9 years for which SIQ data is available and have grown even older in recent years. (Although the increase in older respondents has not been as high as was experienced in the day.)

While the bulk of respondents are also found in the middle age group, the total for this group (age 20 to 34) has declined between 1976 (68.5%) and 1988 (63.3%). However, the age distribution within this middle age group has shifted toward the higher age bands. Growth has occurred in the 25-29 and the 30-34 age bands.

Over the years, few teenagers are to be found attending evening classes and a much larger proportion of the students are over age 35. Almost three times the number of older students are to be found in the 1988 evening division (33.1%) as are to be found in the day division (11.3%). Even larger differences occurred in earlier years.

ETHNICITY

DAY. In 1976, 38.2% of the day respondents were White (Not Hispanic). That figure has steadily declined to 24.7% in 1988. Other declines in day representation were experienced by Alaskan Natives/American Indians who were 1.2% in 1976 and seven-tenths of one percent in 1938; Blacks (Not Hispanics), who declined from 12.1% in 1976 to 8.7% in 1988; and, Japanese whose largest representation was registered in 1976 at 2.7% (they dropped to 1.7% in 1984—a consistent figure for the last three administrations of the SIQ).

Ethnic groups that have increased representation among day respondents of the SIQ between 1976 and 1988 are: Hispanics/Latinos/Chicanos (who grew from 8.2% to 12.1% in 1988), Chinese (from 26.3% to 30.4%), Filipinos (from 6.5% to 10.4%), Southeast Asians (from 1.3% to 3.7%—this group peaked in 1984 at 4.8%), and Other Asians/Pacific Islanders who gained one percentage point (from 2.7% to 3.7%).

EVENING VS. DAY (PERCENTAGE CHANGE). The general patterns of growth and decline discussed for day students between 1976 and 1988 also occur within the evening division with the following qualifications. Alaskan Natives/American Indians experienced smaller losses in the evening division. Percentage *change* (loss) for Blacks was 28% in the day division and 11.5% in the evening division. Whites declined by 35% during the day and 14.2% during the evening. Day Hispanic respondent representation grew 32.2%; evening growth was 26%. Chinese day respondents grew by 13.5%; evening growth was 34.5%.

Filipino respondents experienced C7.5% growth in day representation and a 10.6% loss for the evening division. The percentage representation of the remaining groups is so small that it serves little practical purpose to discuss percentage change. In these instances, it is best to refer to the figures directly. For example, between 1976 and 1982 Southeast Asian day respondent representation increased by 73%. However, this refers to an actual percentage change from 1.3% to 4.8%.

U.S. EDUCATIONAL ATTAINMENT

DAY AND EVENING. If one subtracts education not in the U.S. from the responses to the question: In the U.S. the highest diploma, certificate or degree I have received is (see Moss page 26 for Day and page 31 for Evening), it clarifies the meaning of U.S. education and results in the percentage distributions for day and evening respondents from 1976 through 1988 presented below. The vast majority of day respondents have received a high school diploma or equivalent (i.e., G.E.D. or Proficiency Certificate). Less than fifteen percent in any given year indicate receiving an associate degree or higher.

Evening respondents, on the other hand, appear to be more educated than day respondents. Fully 47.1% of 1988 evening respondents indicate they have completed an associate degree or higher. This is an increase from 35% in 1976. Level of education, employment status and eductional goal are clearly interrelated, as it becomes obvious when the responses of evening students to these items are discussed later in this report.

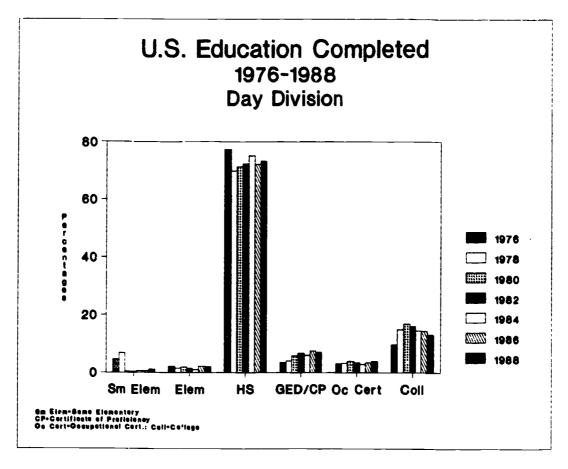

FOREIGN EDUCATION

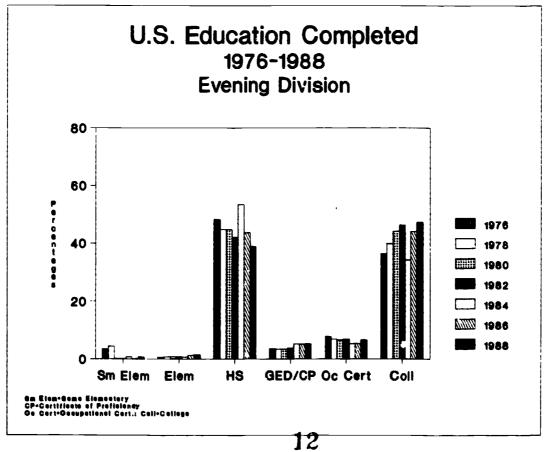

A symmetrical question about the *highest diploma, certificate or degree* achieved by respondents outside the U.S. was initiated in 1984. In the table below, the option *no education outside the U.S.* was deleted.

DAY. High school diploma is also the modal (most frequent) response for respondents with education outside the U.S.—but at a much lower rate than occurs for U.S. educated respondents. The drop from 53.3% with high school diplomas in 1984 to 43.4% in 1988 may be due, in part, to changes in the wording of the question. The percentage of respondents with education outside the U.S. selecting did not complete ementary school or elementary school or middle school/junior high is considerably higher than the percentages among U.S. educated respondents. A full third of the 1988 respondents indicated elementary school completion or less education. This combined figure was 30.9% in 1984 and 38.4% in 1986.

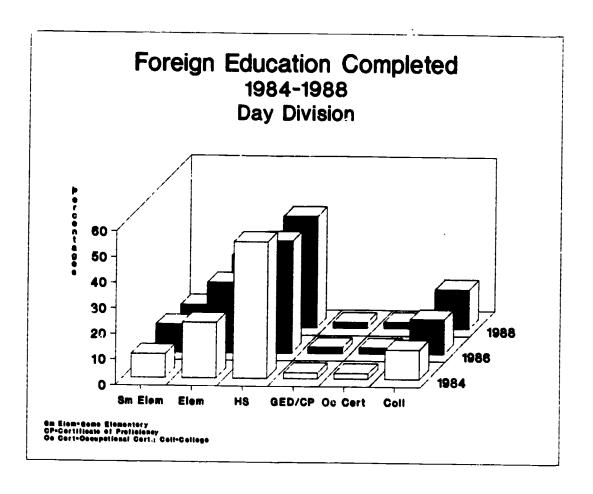

EVENING. Evening respondents who received diplomas or degrees outside the U.S. are also more educated than their daytime counterparts. Fewer evening students with education outside the U.S. endorse the options at the lower end of the educational scale, more of them are degree recipients. Thirty-three and a half percent of the 1988 respondents with foreign education indicated they have completed associate or higher degrees. (In 1986, the figure was 13.4%; in 1984, it was 11.3%.)

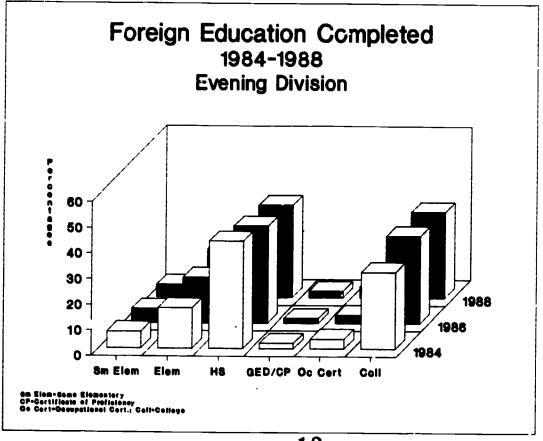

EDUCATIONAL GOAL

This item appeared in 1976 and was modified in 1980. Thereafter, the wording has remained the same. Four dramatic trends revealed over this time for day respondents are INCREASES in the number of students who

- + Indicate transfer to a 4-year college or university as their main educational goal while at City College (from 48.5% in 1976 to 62.1% in 1988), and who
- + Indicate their main educational goal is to learn or improve my English (almost three times as many selected this option in 1988 as did in 1976).

Equally dramatic are DECREASES in the number of students who

- Indicate completion of a 2-year degree program as their objective (this option, although clearly second in rank in each year it was asked, dropped by about half from 22% in 1976 to 11.2% in 1988), and who
- Indicate *personal interest* as their *main educational goal* (this dropped by about one-third from 14.5% to 9.5%).

EVENING. As we have seen before, evening respondents are very different from day respondents. In the evening personal interest is the most endorsed option across the years this question is asked (from 34.1% in 1976 to 38.7% in 1988). Transfer to a 4-year college or university is clearly second in rank across the years (20.7% in 1976 and 24.6% in 1988), followed by advance in present occupational field which is consistently third across this time period (although down from 14.3% in 1976 to 8.9% in 1988).

MAIN PROBLEM IN COMPLETING THE SEMESTER

DAY. This question has only a three administration history and the data for day respondents appear to be fairly consistent except for the decline in the number of respondents endorsing financial need as a potential obstacle to completion (from 15.9% in 1984 to 9.2% in 1988) and increases in those endorsing study habits (from 9.1% to 10.9%), and other skill deficiencies as problematic. Reading/writing skill as possible problem in completing the semester increased from 7.6% in 1984 to 11.1% in 1988, and math skill from 3.3% to 4.9%.

EVENING. Students indicate work conflicts as the main problem and this has grown consistently over the three years this item has been included in the questionnaire (18.1% in 1984; 21.3% in 1986; 27% in 1988). Otherwise, it is difficult to discern a clear pattern over these three administrations for the other questions. *Financial need* was less likely to be endorsed in 1988 (3.1%) than it was in 1984 (6.6%).

PRESENT OCCUPATION

Changes in wording on this question make it somewhat difficult to discern clear patterns over the years. However, among day respondents, most of the distribution is accounted for by regular part-time work (this option clearly ranks first across the years); employed 30 hours or more per week (second in every administration except 1976); full-time student, not employed (clearly third in rank across the years, this option has increased from 16.1 % in 1976 to 21.3% in 1988); and, seeking employment and occasional part-time work which both compete for fourth rank. Conceptually these last two options are very similar and their

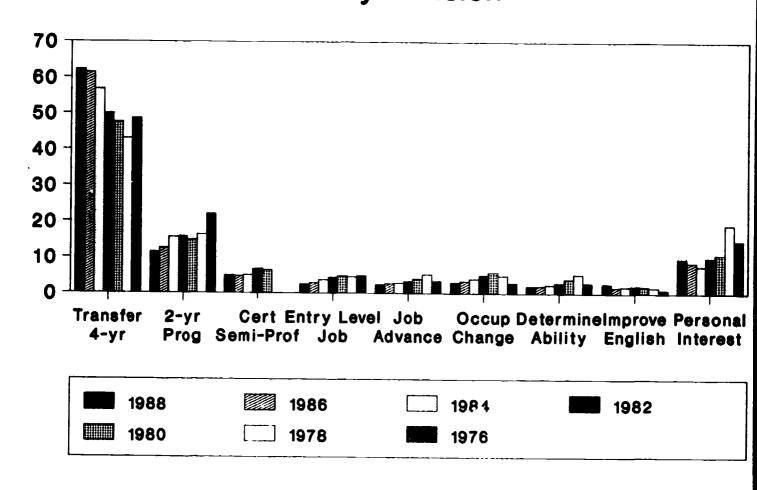

14

combined percentage rank shifts from first (1980, 1982, and 1984) to second (1976 and 1978) to third (1986 and 1988). Since the wording on this item has changed over time, it is difficult to draw any definitive conclusions about the meaning of changes in endorsements since 1976. However, as would be expected, there are clear differences between day and evening respondents on this item.

The vast majority of evening students work full time, this is true across all administrations of the SIQ at City College. The range has been from a peak of 82.6% for evening respondents in 1978 to 68.4% in 1984 (77.1% in 1976 and 73.7% in 1988). Regular part-time work is clearly second rank for the years 1976 through 1986. However, the fairly even distribution across other options and the changes in wording over time make any further comparisons questionable.

STUDENT SERVICES!	•	•	,	,	,	,	,

Student service items vary considerably: 1978 and 1976 asked, What one kind of student service would be most helpful (9 options); 1980 asked students to select two services in order of importance; 1984 separated counseling services (10 options) from other student services (8 options) and asked respondents about expected use; 1986 asked respondents to indicate expected use of first and second most important counseling service; 1988 listed 13 student services and inquired about three levels of knowledge and use. In addition, 1988 asked about meeting with counselor to develop an educational plan and whether or not the student attended a group educational planning session.

22

¹Y indicates YES. The question was asked in 1982; however, the placement of the item in the survey (i.e., letter reference A, B, ..., Z) was unavailable.

Separate day and evening questionnaires were used for this year. The only difference between them was that item O on the day form asked if the student was enrolled in two or more courses of a specified vocational program (10 options) and O on the evening form asked about scheduling preferences for evening courses (6 options).

^{*}The education outside the U.S. row indicates that education outside the U.S. was subsumed as the first option under the U.S. education item.

³ In 1978 and 1976 reference was to personal, not household income. Also, 1988 introduced the qualification, "before taxes".

II. SUMMARY OF 1988 RESULTS

II. SUMMARY OF 1988 RESULTS

A. TECHNICAL ISSUES

How Representative Is This Group of Respondents?

One way of gaging the adequacy of the 1988 sample is by comparison with enrollment figures for Fall 1988. The table on page 17a presents data that is offered in support of the contention that, at least in terms of the variables available for comparison, the 1988 City Coilege SIQ respondents closely resemble the make-up of the total student-body.

Data Collection Procedures and Response Rate

Questionnaires were distributed to students prior to entry to the registration arena on campus and to every off-campus site where City College courses are offered. On campus, students were instructed to complete the questionnaire before advancing to the first "station" in the registration process. Student assistants hired to distribute and collect the questionnaires were instructed to encourage cooperation, but the SIQ is not compulsory.

The overall response rate for the six week registration period (mid-July through the second week of the Fall semester) was 75%. The number of completed questionnaires collected each day were compared with the number of registrants and the daily response rate was fairly consistent throughout this time.

The response rate **per item** for DAY and EVENING students is indicated on the sample questionnaire at the end of this section (page 17b). The item response rate is calculated from the total respondents per division.

Site administrators were responsible for data collection at the respective off-campus sites. Data collection was not uniformly effective across the off-campus sites. Off-campus sites accounted for 18% of the total Fall 1988 enrollment of City Colleges students, loss of data from sites is important because some sites offer specialized vocational training and other sites have the potential of contributing higher numbers of underrepresented students to the database (because of the racial composition of the neighborhoods from which they draw). For these reasons, greater care should be taken in future to insure that questionnaires are completed at all off-campus locations.

Students were trained to prepare the questionnaires for data entry and forms were submitted to a private key-punching firm. Data tapes were run by the Computer Services department of the San Francisco Community College District. Paul Downing and Mark Sapiro prepared the programming changes that were required by changes in the questionnaire format.

Report Organization: How To Find What You Need

The Table of Contents lays out the general presentation of data and within each report section information about day students generally precedes information about Evening students (unless the data for evening students is particularly dramatic).

Tables at the end of the report are provided in the following order: Day (yellow paper), Evening (blue paper), Total Institution (white paper). Please note that the total numbers exceed the sum of day and Evening because about 16% of the respondents selected the option "both day and evening". In the interest of saving space these tables were not included in the report. In general, it can be said that the profile of students enrolling in both day and evening classes most closely resembles that of day students. If the reader has a specific interest in this group or requires any additional information not provided in this report, s/he may contact the Research Office at City College for assistance.

When referring to the full tables at the end of this report, please note that the headings across the top of the page are independent and response distribution is calculated for the subgroupings within the left side stubs. For example, if you are interested in knowing the gender distribution within ethnic groups, use the table with ethnic headings at the top and refer to the the gender question in the left hand stub. This will give you the male:female ratio within the ethnic headings at the top. If you are interested in knowing what the ethnic composition is of all City College day women, use the day table with sex at the top and refer to ethnicity on the left hand stub. This will tell you what the ethnic composition is of day female (male and undeclared) respondents.

••• THANK YOU FOR COMPLETING THIS SURVEY •••

B. REPORT SUMMARIES

INTRODUCTION

There are a total of 36 items: 21 main questions (upper case letters A through U, 13 specific student service knowledge and usage questions, division and zip code.

SFCCD Computer Services created tables breaking down SIQ '88 responses by all 36 survey items. This means that full responses for all sub-groupings within the item categories are available, for example: sex (male/female), age (10 groups), ethnic (10 groups), units completed (7 groups), mode of transportation to class (8 groups), iob situation (8 groups), etc. The full set of tables for the entire survey is available in the CCS. Research Office. At the end of this rep. 'you will find full sets of responses (day division, evening division, and total institution) for 'he following items: (1)Sex, (2)Age, (3)Ethnicity, (4)Division, and (5)Educational goal.

DIVISION VARIATIONS FOR SEX, AGE, AND ETHNIC GROUPS

Trends in Age, Ethnic, and Gender representation (as well as many other comparable survey questions) have been presented in the Historical section at the beginning of this report providing the reader with substantial information reflecting where City College stands today in relation to prior years.

The following summaries and graphs provide a closer look at the 1988 respondents as these variables are cross-sectioned against other variables of interest.

GENDER HIGHLIGHTS: DAY AND EVENING RESPONDENTS

When one travels through the tables presenting questionnaire responses for men and women who registered for day classes, or for evening classes, the most striking result is the similarity in responses between genders. In fact, similarities in response patterns are more often attributable to division than to sex. Differences that do occur are summarized here.

SEMESTER UNITS

DAY. More men than women intend to register for 16 or more units (16.1% vs. 12.6%) and at the lower end of the unit scale, one-third more women than men intend to register for three or less units (6.4 % vs. 9.9%). Otherwise, the distribution across the other unit bands is very similar for men and women.

EVENING. The distribution of men and women across the unit bands is very similar with the exception that a slightly larger percentage of men than women (8% vs. 6%) intend to enroll in 10 or more units.

TRANSPORTATION

DAY. Men are more likely than women to get to class as drivers (48.9% vs. 33.9%), to bicycle (1.3% vs. .6%), to walk (3.2% vs. 2.9%), or to use motorcycles/mopeds (3.0% vs. .8%). Women are more likely than men to arrive as passengers of cars (4.7% vs. 2.6%), of MUNI (46.4% vs. 31.3%), or of BART (10.1% vs. 8.8%).

29

EVENING. Evening students are most likely to drive, whether they are men (61.5%) or women (56.3%). Consistent with day respondents, men are more likely to be drivers, walkers, bicyclers, and motorcycle/moped riders than are women. And again, women are more likely than men to arrive to class as automobile (5.4% vs. 2.1%) or public transic (31.2% vs. 28.3%) passengers. However, the gender gap in MUNI usage by evening men and women is much more similar (21.9% vs. 26.2%) than the fifteen percent difference that occurs in the day.

REASON FOR CHOOSING CCSF¹

DAY. Not counting the option "other", Lower Fees is the modal response for both men (24.1%) and women (28.2%) and the rank order of the remaining items is the same for both sexes: Special Program (men 16.9%; women 18.1%), Ineligible CSU/UC (men 13.1%; women 10.9%), CCSF Reputation (men 12.9%; women 10.2%), Live at Home (men 7.3%; women 5.7%), High School Advised (men 4.3%; women 4.1%), and First Choice Denied (men 3.2%; women 2.6%).

EVENING. Lower fees appears to be even more important in the evening than in the day. This is true for both men (day 24.1%; eve 33%) and women (day 28.2%; eve 40.4%). Special Program ranks second in the evening for both men (22.7%) and women (20.9%). The Reputation of City Codege ranks third for both men and women, although men select it more frequently (11.9%) than women (7.6%).

MAIN EDUCATIONAL GOAL

DAY. The rank order for the top four responses is the same for men and women: Transfer to a 4-year college or university (men 64.6%; women 60.3%), Two Year Degree Program (men 10.2%; women 12.1%), Personal Interest (men 6.2%; women 7.1%), and Semi-professional Certificate (men 4.4%; women 5.2%).

EVENING. The three highest ranking options on this item for evening men and women are the same: Personal Interest (men 33.3%; women 33.9%), Transfer (men 25.4%; women 23.9%), and Advance in Occupation (men 9.3%; women 8.4%).

Job-related educational goals are clearly more important to the evening students. If we combine the four job-related options on this item (Prepare for an Entry Level Job, Advance In present Occupational Field, Change Occupation, and Determine My Ability in a New Occupational Field) we again find more similarity within division than we do within sex. In the evening 22% of the male responses fall within these four options as do 21.2% of the women's responses. During the day, only 9.6% of the men and 9.5%% of the women select these job-related options.

U.S. EDUCATION

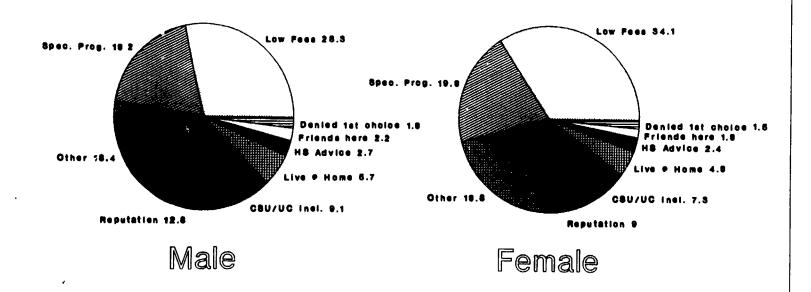

DAY. The modal response for both men (62%) and women (59.4%) is High School Diploma. More men (6.1%) than women (5.4%) indicate they earned a G.E.D. or Proficiency Certificate. More women than men indicate they have earned a Bachelor's degree or higher (6.4% vs. 4.4%).

EVENING. While it remains the modal response, about haif as many evening students indicate High School Diploma as their highest educational achievement (men 30.9%; women 35.3%). A much larger percentage of evening students, both men (30.8%) and women (30.6%), have earned a bachelor's degree or higher.

¹Results on this item should be evaluated cautiously because of the large number selecting the option "other": DAY men (15%), Day women (19%) and 23% of both male and female EVENING respondents

(Includes Entry Level Job, Job Advacement, Occupation Change)
(Includes Improve English, Determine Ability, Personal Interest)

FOREIGN EDUCATION

DAY. The foreign educational profile of men and women is remarkably similar with the exception that a few more men indicate completing their prior education at the elementary/Junior High School level (14.1% vs. 12.6%) and, as with U.S. education, more women than men indicate having earned a bachelor's degree or higher—but the difference is quite small (4.7% vs. 4.3%).

EVENING. Evening students are more likely to indicate they have received no foreign education (men 60.9%; women 65.3%). Among those who do indicate they earned their highest degree or diploma abroad, most men (14.1%) and women (12.6%) indicate receiving the equivalent of a High School Diploma. Nine and six-tenths percent of the men have earned a bachelors degree or higher compared to only 7.7% of the women.

JOB SITUATION

DAY. Men are more likely than women to work full time (25.4% vs. 18.7%). Women are more likely than men to work part time (27.6% vs. 23.2%). The other options are similarly endorsed by men and women, including Seeking Full Time and Seeking Part Time Work.

EVENING. As it would be expected, fewer evening students are unemployed. Only 8.1% of the men perceive themselves as primarily students whether full-time (3.9%) or part-time (4.2%) and only 5.5% of the men are seeking employment. Nor are women likely to be students only—6.7% selected these options (full-time 3%; part-time 3.7%). Just 5.1% percent of the women are seeking employment.

Seventy-five percent of the women and 72.5% of the men are engaged in full-time work.

MAIN PROBLEM

DAY. Contrary to stereotype, more women than men anticipate difficulty with Reading/Writing Skills (11.3% vs. 10.6%), and men are more likely to anticipate difficulty with Math Skills (5.6% vs. 4.3%).

Consistent with current social roles, more women (5.7%) than men (4%) anticipate Family/Personal Problems and more than four times as many women than men indicate Child Care may negatively affect their ability to complete the semester.

Also, a third more men than women indicate work conflicts (14% vs. 9.5%) and more men than women indicate financial problems (10.1% vs. 8.3%).

EVENING. As would be expected from the employment discussion above, Work Conflict is far and away the primary concern evening students have regarding their ability to complete the semester. Twenty-eight percent of the men and 26.3% of the women select this option. However, half of the evening men and women indicate No Problem in completing the semester. (This compares to only 37.6% of day men and 42.4% of day women who selected No Problem.)

HOUSEHOLD INCOME

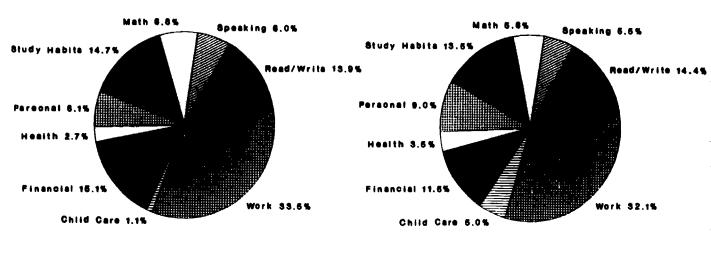

DAY. Women report lower household income than men. Forty percent (40.1%) of women report household income of \$9999 or LESS compared to 34.5% of the men. More men than women report earning between \$10,000 and \$29,999 (41.8% vs. 38.4%). At the highest end of the income scale, 24% of the men and 21% of the women come from households earning \$30,000 or more.

Main Problem in Finishing this Semester By Gender

Male

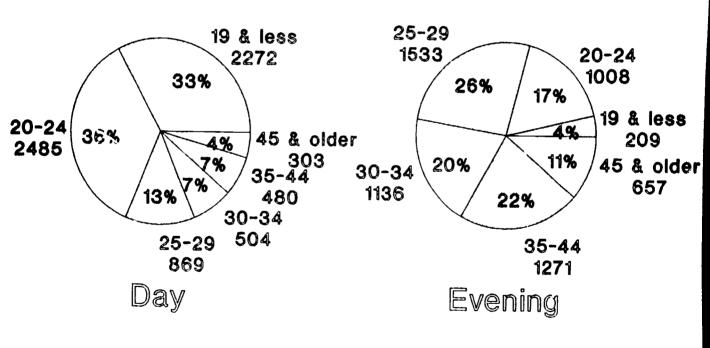

Female

Excluding 'None' (Men-2843; Women-3795)
Total Number Men-8801; Women-8373.

1988 SIQ Age Distribution by Division

EVENING. There appears to be less disparity in household income between the sexes enrolled in evening classes, except, that is, at the highest household income level. Fifteen percent of the men and 14% of the women earn \$9999 or less. Fifty-three percent of the women and only 45% of the men earn between \$10,000 and \$29,000.

In the higher abusehold income bracket, however, almost 40% of the men and only 34% of the women indicate household earnings of \$30,000 or more.

SIMPLIFIED HOUSE OLD INCOME

	D	A Y	EVE	NING
Income	Male	Female	Male	Female
=< 9999	34.5	40.4	14.8	13.8
10-29,999	41.8	38.4	45.4	52.6
=> 30,000	23.8	21.2	39.8	33.8

NUMBER IN HOUSEHOLD

DAY AND EVENING. Day men (18%) are more likely than women (14%) to be living alone. There is less difference in the evening with about 36% of the men living alone and 32% of the women living alone.

AGE

DAY. The sexes are fairly well balanced in numbers in the middle age bands. Only at age twenty are men the majority. The gender ratio diverges most clearly at the age extremes, that is age rineteen and younger and after age 35.

PERCENT FEMALE

Age Group	Day	Evening
	<u> </u>	
Under 18	52.9	51.2
18-19	53.7	60.0
20	48.5	57.0
21-24	50.1	62.6
25-29	49.5	59.8
30-34	50.7	56.4
35-44	64.8	57.8
45-54	67.1	58.3
55-64	66.2	57.9
65 Plus	63.3	45.8

EVENING. Women predominate in every evening age category except the youngest where their majority is slim and the oldest where they are clearly underrepresented.

¹Refer to tables at end of the report for full income categories. There are nine options.

SEXUAL ORIENTATION

'AY. Women (10.3%) are somewhat more likely than men to decline to state (9.8%) their sexual orientation. The incidence of male Gay identification (4.3%) is three times the incidence of female Lesbian identification (1.5%) found among women.

EVENING. Evening students are much more likely to indicate a gay or lesbian sexual orientation than are day students. Three and a half times as many evening men indicate a gay sexual orientation as do day male respondents. Evening women are also 3.7 times as likely to indicate lesbian orientation as are day female respondents.

At the same time, evening students are more likely to decline to state their sexual orientation than are day students.

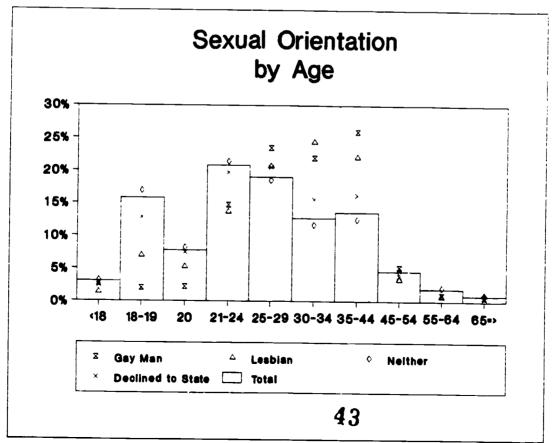

Sexual Orientation
Fall 1988 SIQ Respondents

DAY EVENING

	Male Fe	male Male	Female		
	%	%	<u>%</u>	<u>%</u>	
Gay Man	4.3		15.0		
Lesbian		1.5		5.6	
Neither	85.1	87.8	72.1	82.1	
Decline	9.8	10.3	12.6	12.0	

Sexual Orientation by Age Group. While only 12.7% of all SIQ respondents fall within the 30-34 year age group, 22% of gay males are in this age group as are 24.4% of lesbian respondents.

Similarly, only 13.6% of all respondents are in the next oldest age group (35-44), yet 26% of the gay men and 22.1% of the lesbians are within this age group.

PERCENT FEMALE WITHIN ETHNIC GROUPS

DAY. The percent female, in rank order for the ethnic/racial groups is: Black 58.9%, White 56.8%, Filipino 55.5%, Japanese 55.3%, Chinese 49.9%, Other Asian 49.6%, Hispanic 49.4%, Southeast Asian 42.6%, and Alaskan Native/American Indian 38.8%.

EVENING. In general, there are more women enrolled in the evening than in the day. The ethnic group rank order on this variable differs somewhat from the day ranking: Japanese 69%, Black 66%, White 59%, Other Asian 58.6%, Filipino 58.5%, Chinese 58.5%, Alaskan Native/American Indian 55.8%, and Southeast Asian 34.1%.

PRIMARY LANGUAGE

DAY AND EVENING. Evening students are more likely than day students to indicate English is the primary language spoken at home and women are more likely than men to speak English at home. More day women (54.8%) than men (49.5%) select this option. In the evening 66.6% of the men and 71.3% of the women indicate English.

ETHNICITY AND DIVISION¹

Data have been presented in an historical context so that the reader is aware of changes in ethnic, gender, and age representation at City College that have occurred over the last 18 years. The purpose of this section is to present a profile of the SIQ respondents categorized by ethnicity and to a more limited extent, reference those profiles against one another.

Group Size. Before we continue, please be advised that percentages reported can be misleading when the total number of cases for a group is small. When the total is small, each individual case carries more weight than when the total is larger. In this instance, data presented for Alaskan Natives/Native Americans should be read cautiously. For example, there are only 48 Alaskan Native/American Indian DAY responses to the question requesting students to list the Main Problem they may have in completing the semester. For this small number, the difference between a single case and two cases doubles the percentage distribution from 2.1% to 4.2%. For the larger ethnic groups a single case carries much less weight.

Data for six ethnic groups will be presented, but the reader is advised to tread cautiously before drawing conclusions about sub-divisions of small groups.

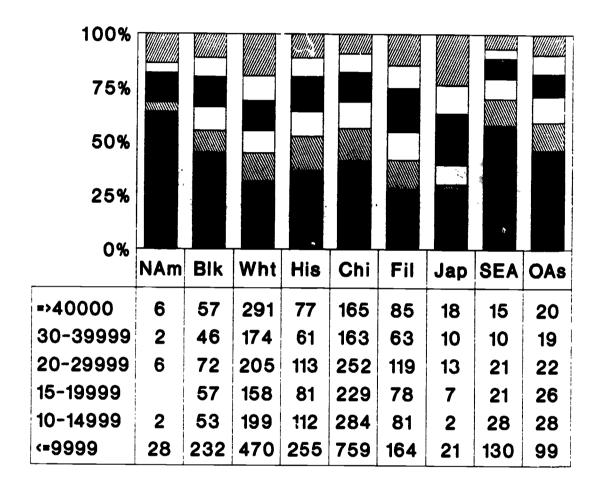

Profiles. Please note that within the context of each profile data is provided for other ethnic groups. Therefore, in order to avoid redundancy, these profiles differ somewhat from one another and the reader is advised to read all the profiles, even if s/he is interested in one particular group for comparative information is dispersed throughout the profiles. Also note that gender ratios for each ethnic group have already been presented in the previous section and graphs depicting income (Day and Evening), and age levels (total only) precede the profiles.

44

¹Not included in this report are the 16% of all respondents who indicate they attend **both** day and evening classes and the three percent who failed to declare a division (day or evening or both) item. Although 19% of the cases are missing from the reports that contrast day against evening, there does not appear to be any bias based on ethnic distribution for either the missing cases or the day-and-evening group.

Household Income by Ethnicity Day Division

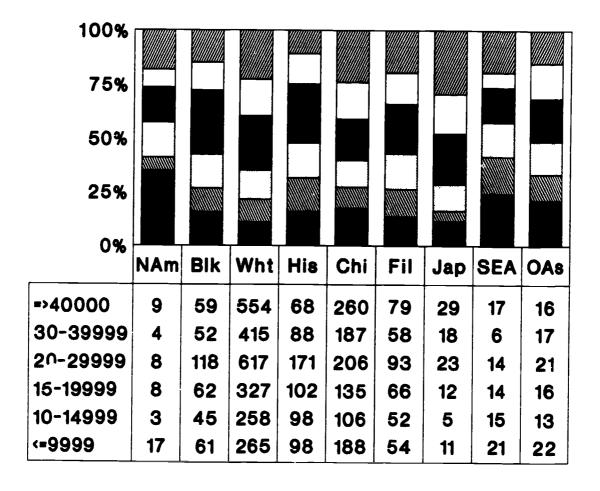

-9999	10-14999	15-19999

20-29999	30-39999	- >40000

NAm-Native America'i; SEA-Southeast Asian OAs-Other Asian For more income groups, see tables.

Age Distribution Ethnic Groups Total Respondents

ALASKAN NATIVES/AMERICAN INDIANS

Enrollment Patterns

Alaskan Natives/American Indians comprise just under one percent (.9) of the total SIQ respondents.

Forty-seven percent of these students are enrolled in DAY classes and of those (total number 48), 58% enrolled in between 10 and 15 units, 12.5% enrolled in 3 or less units, 12.5% enrolled in 16 or more units, 8% enrolled in between 4-6 units and 8% in 7-9 units.

Of the 54 Native American students enrolled in EVENING classes, 22 (41%) enrolled in 3 or less units, 21 (39%) enrolled in 4-6 units, and 11 (20%) enrolled in 7 or more units.

Response Patterns

This group is the least likely of all ethnic groups enrolled in the day to indicate having met with a counselor to develop an educational plan—56%. For all other ethnic groups, affirmation ranges between 70.3% (White) and 80.4% (Filipino). However, compared to other evening students, this group is MORE likely to affirm this statement (34%) than are White students (19.5%), Chinese (22.3%), Japanese (18%), Southeast Asians (19.3%), or Other Asians (31.8%).

These DAY students are more likely to arrive to class by using public transportation (45.6% when MUNI and BART are combined) than by driving themselves (34.8%) or as automobile passengers (2.2%). Seventeen percent use other methods of transportation. In the evening, like most other ethnic groups, they are more likely to drive (57%) or arrive as automobile passengers (6%), and only 26% use public transportation.

For the most part, these DAY students select City College because of its reputation (22.4%), because they are ineligible for CSU/UC (18.4%), and other undetermined reasons (18.4%). For EVENING students, lower fees (31.4%) is clearly the leading reason for selecting City College, followed by other undetermined reasons (21.6%), Special Programs (19.6%), and CCSF Reputation (15.7%).

As is the case with all the other ethnic categories of DAY students, Transfer (53.1%) is the principal educational goal. Two-Year Program (18.4%) ranks second for these students.

In the EVENING, there is more variation among the ethnic groups regarding educational goal. For Native Americans (33.3% vs. 24.1%), White (42% vs. 20.2%), Chinese (35.6% vs. 20.8%), and Japanese (42.7% vs. 15.6%) students, Personal Interest is the most frequent response, followed by Transfer. For Black (34.7% vs. 21.4%), Hispanic (33.1% vs. 18.7%), Fillpino (34.5% vs. 17.3), Southeast Asian (25.6% vs. 23.3%), and Other Asian (33% vs. 24.8%) students Transfer outweighs Personal Interest.

A bare majority (51%) of these DAY students are the first in their family to attend college, 34.5% are not first, and 14.3% do not know if they are first or not. Assuming those who are first and those who do not know if they are first or not are both groups lacking the advantage of familial college student role models, 65.4% of these students are at a disadvantage on this particular variable. In the EVENING, the relationship is reversed: 27.8% Are First, 64.8% Are Not First, and 7.4% Don't Know.

U.S. Educational. Almost half (47.8%) of these DAY students have received a U.S. high school diploma, three students indicate having received a Bachelor's Degree or higher, and 10 (21.7%) indicate having achieved their highest educational attainment abroad. In the EVENING, 32% indicate completion of a High School Diploma, 30% have a Bachelor's degree or higher, and six percent indicate education abroad.

Job Situation. Fifty-four percent (54.2%) of these DAY students are either full-time (43.8%) or part-time (10.4%) students, who did not intend to work Fall 1988. About seventeen percent (16.7%) had regular full-time employment and 10.4% had regular part-time employment. Consistent with the pattern of most evening students, the majority of Native American (58.5%) students had regular Full-time employment. More, however, considered themselves students-only (17%) and did not intend to work during the Fall 1988 term.

Thirteen of the forty-eight Native American DAY respondents (27.1%) indicate Reading/Writing Skills as the main problem they expected to have in finishing the Fall semester. Twelve students (25%) indicated no problem, six indicated work conflicts (12.5%), six indicated financial problems (12.5%) and the rest were distributed among the other possible problems listed.

For EVENING students, work conflicts are clearly the leading problem with 11 of the 47 (23.4%) respondents selecting this option. Five students (10.6%) indicate Reading/Writing and one or two respondents selected every other option except Physical/Health.

Not only are Native American students the most likely of all DAY students to indicate household incomes of \$9999 or less (63.6%), they peak at the very lowest income category (19 cases [43.2%] indicate household incomes of \$999 or less). Compared to other EVENING students, they are also most likely to be from households earning \$9999 or less. Thirty-five percent (34.7%) of Native Americans are to be found in this category compared to 15.3% of Black, 10.9% of White, 15.7% of Hispanic, 13.4% of Filipino, 11.3% of Japanese, 24% of Southeast Asians, and 21% of Other Asians. At the highest income level \$40,000 or more, evening Native American students are better represented (18.4%) than Blacks (14.9%), Hispanics (10.9%), or Other Asians (15.2%).

BLACK STUDENTS

Enrollment Patterns

As is the case with most other ethnic groups attending City College during the DAY, most Black students are enrolled in between 10-12 units (30.2%) or 13-15 units (23.8%). A full quarter (25.5%) attended Summer school just prior to Fall 1988, 28.9% have never attended City College before the Fall 1988 term, and 31.5% are continuing students from the Spring 1988 semester. Fourteen permant (14.1%) of these students last attended City College a year or more prior to Fall 1988.

One third (33.2%) of the Black day students have completed no units at City College. Forty-one percent (40.6%) would be considered Freshmen (1-30 units completed), 19.8% would be considered Sophomores (31-60 units completed), and six percent (6.4%) have earned 61 or more units at City College.

In the EVENING 70.5% enrolled in 6 or less units Fall 1988. Twenty-two percent (22.2%) had completed no prior units at CCSF, 48.1% were Freshmen, 20% Sophomores, and 9.6% had completed 61 or more units before enrolling in Fall 1988.

Response Patterns

Almost 80% (77.9%) of Black DAY students indicate they have met with a counselor to develop an educational plan. In the evening, 31.7% indicate they attended such a meeting.

Transportation. Among DAY students, Blacks (46.5%), Chinese (46.1%), and Southeast Asians are most likely to use MUNI. Seven percent of Blacks (7.3%) use BART and 36.3% drive themselves to school. In the EVENING, the transportation profile of all ethnic groups is quite similar. Fifty-seven percent (56.9%) of the Black students arrive as drivers, 4.8% as car passengers, 31.7% arrive by public transit (MUNI 26% and BART 5.7%), and 6.4% by other methods.

Reason for CCSF. Among black students who attend DAY classes, Special Program (20.1%), Lower Fees (19%), and the option "other" (18.5%) receive comparable endorsements followed by CCSF Reputation (15.8%), and Ineligible to Attend SCU/UC (12.5%).

As with every other group in the EVENING, Blacks rank Lower Fees (34.6%) well ahead of the other options: Special Program (22%), Other (21.7%), CCSF Reputation (14.1%) and all other options less than 4%.

Main Educational Goal. All ethnic groups enrolled in day classes indicate Transfer most frequently and Two-year Program second. The three highest (and closely) ranked options for Black DAY students are: Special Program (20.1%), Lower Fees (19%), and Other, undetermined reasons (18.5%). Fifteen percent (15.3%) indicate that either they were ineligible for CSU/UC (12.5%) or their First Choice was Denied (2.8%).

As discussed earlier, Lower Fees takes precedence for EVENING students. Thirty-five percent (34.6%) of Black students in evening classes select this option, Special Program ties for second (22%), along with Other undetermined reasons (21.7%) and CCSF Reputation (14.1%) ranks third.

Thirty-seven percent (37.2%) of this DAY group are either the first in their family to attend college (32.9%) or don't know (4.3%) if they are. Black familial college attendance (62.9%) exceeds that of Native Americans (34.7%), Hispanics (56.8%), Chinese (56.8%), Southeast Asians (53.2%), and Other Asians (53%). In the EVENING, Blacks (67.7%) indicate they are NOT First to Attend College at a rate comparable to Whites (68.8%) and Southeast Asians (66.7%). Highest ranking on this option are Japanese students (76.8%) and Filipinos (70.3%). The evening group LEAST likely to have family members who have attended college are Hispanics (55.7%).

U. S. Education. Among DAY students, more Black students indicate that High School Diploma is their highest level of educational completion (70.9%). Other groups select this option in this descending order: Hispanics (66%), Filipinos (62.5%), Whites (60%), Chinese (58.9%), Other Asian (56.6%), and Native Americans (47.8%).

Among EVENING students, Blacks are also most likely to indicate High School Diploma as the highest level of educational completion (49.8%).

Black DAY students are among the LEAST likely to have earned a baccalaureate or higher degree. Whites (12.4%) are most likely to have earned a Bachelor's degree or higher, followed by: Japanese (10.9%), Native Americans (6.5%), Chinese (3.6%), Other Asians (3.2%), Blacks (2.6%), Southeast Asians (2.4%), Hispanics (2%) and Filipinos (1.9%).

Among EVENING students, Blacks (20.5%) place between Japanese (41.8%) and Whites (40.4%) at the top end and Hispanics (12.4%) and Filipinos (8%) at the lower end of those who have completed a Baccalaureate degree or higher.

Foreign Education. Blacks are the second most likely of all day respondents to indicate they have received no foreign education (77.8%). Whites rank first (81.5%). In the evening, Blacks (84.7%) tie with Whites (84.8%) on this option.

Job Situation. Southeast Asian (33.1%), Other Asian (31.3%), Chinese (28.1%), and Japanese (27%) DAY students are more likely than Blacks (20.9%) to consider themselves Full-time/non-working students. Filipinos (17.7%), Hispanics (15.2%), and Whites (14.3%) rank below Blacks in the frequency of response on this option. In the evening, between half (52.8% of all Southeast Asians) and 80.8% (Whites) of all respondents have regular full-time work. Seventy-five percent (75.1%) of Blacks select this option, only 7.5% are non working students, 19.% have intermittent or regular part time work, and 7.5% were seeking work in Fall 1988.

In response to the Item Indicating which main problem they perceive may affect their ability to complete the semester, all ethnic groups except Native Americans (25%) are more likely to indicate NONE than they are to select a specific problem from the ils, provided.

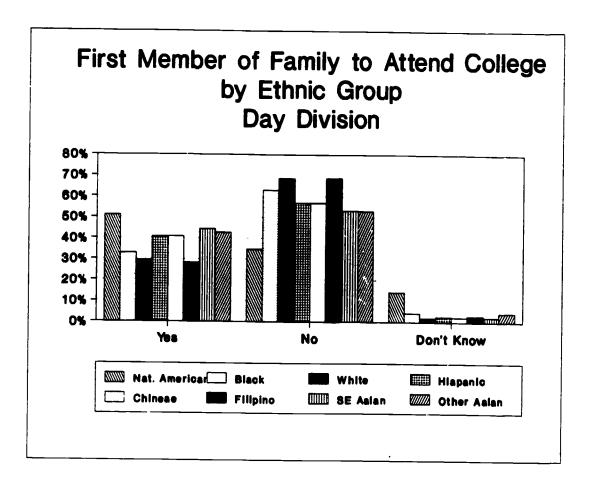

Among Black DAY students, 41.8% select NONE, which is comparable to the 40.5% of Filipinos, 40.3% of Hispanics, and 37.8% of Japanese students who select this option. Most likely to select NONE are White students (50.5%). After Native Americans, Southeast Asians 27.1%, Other Asians 32.4%, and Chinese (33.4%) are the least likely to Indicate no problem.

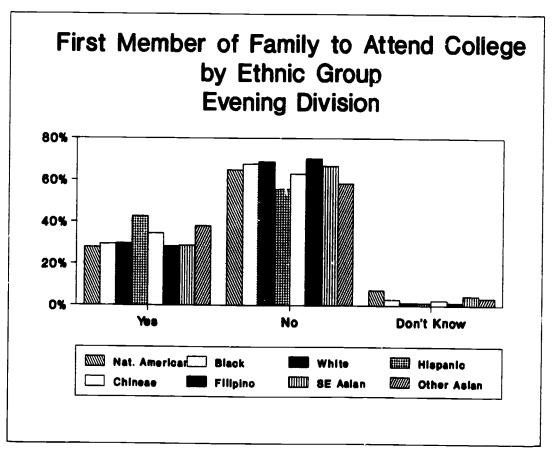

Of those who do Indicate a problem, Black students are more likely than any other group to indicate Financial Problems (13.2%) followed by Work Conflicts (11.4%), Study Habits (11%), Math Skills (7.1%), Family/Personal Problems (6.5%).

Among Black students attending in the EVENING, work conflict rises to prominance (24.9%), followed far behind by Family/Personal Problems (6.7%) and Study Habits (5.8%).

!

WHITE STUDENTS

Enrollment Patterns

In common with Black (30.2%), Hispanic (29.5%), and Japanese (30.1%) DAY students, White DAY students are most likely to enroll in between 10-12 units (24.9% selected this option). What is interesting about this group is the similarity in endorsement across the first three unit bands:

Semester	Units:	White	DAY	Students
3 or Less 4 - 6	13	• •		
4-0 7.0	14.			

White, Japanese (13.3%) and Native American DAY students (12.5%) are the most likely to enroll in 3 or less units. All the other ethnic groups have about haif that proportion of enrollments in this unit category.

After Japanese (59.6%), White (54.4%) EVENING students are most likely to enroll in 3 or iess units. Thirty percent fall into the 4-6 unit, 11.2% into the 7-9 unit category and the remainder (4.4%) enroll in more than nine units.

Of all the EVENING respondents, whites are the most likely to indicate they have completed No prior units at CCSF (34.1%), followed by Filipino (27%), Hispanic (25.5%), Other Asian (23.4%), Black (22.2%), Japanese (20.2%), Native Americans (19.2%), and Chinese (17.2%).

Response Patterns

Developing an Educational Plan. Except for Native Americans, White students are least likely of all DAY students to indicate they have seen a counselor or advisor in order to develop an educational plan.

Transportation. White students are the most likely of all DAY students to arrive to class by driving themselves (50.4%) and they are the least likely to use MUNI (30.8%). In the EVENING, White students are consistent with the transportation patterns of the other groups relying principally on driving themselves to class (57.2%) and using public transportation (30%-24.3% MUNI and 5.7% BART).

Why City College? Except for Native Americans (22.4%), White students are the most likely to indicate that the Reputation of CCSF was the main reason they choose to attend. As is the case for every DAY group except Blacks (who rank fees second to Special Program) the modal (most frequent) response was Lower Fees (28.7%).

Among EVENING students, Lower Fees appears to be most important to White (41.9%) and Japanese (41.5%) students. While this is the modal response for all groups, these two give it more weight. Second in Importance for White students is Special Program (20.6%). Keep in mind, however, that a full quarter (24.5%) select "other" as the main reason for choosing City College. There are reasons here that are not being elicited by the list of options provided in this question.

What Educational Goal? Consistent with every other DAY group, white students indicate Transfer is their main educational goal, however they (11.8%) and Japanese students (14.5%) also consider personal interest important. For White students personal interest ranks second and two-year program (10.9%) ranks third. Among Japanese day students the order is reversed for second and third rank.

In the EVENING, White students are also most similar to Japanese students when Educational Goal is considered. Both groups give greater weight to Personal Interest (Whites 42%; Japanese 42.7%) than do any of the other groups and rank Transfer second (Whites 20.2%; Japanese 15.6%).

In response to the item asking whether the respondent is the first in their family to attend college, Whites are most similar to Filipinos in their responses. Twenty nine percent (29.3%) Indicate they are first, 68.6% indicate they are not first and 2% don't know. For Filipinos the rates are 28.2%, 68.8%, and 3%.

White evening students are similar to White DAY students on this item: 29.7 indicate they are first, 68.8% not first and 1.5% don't know.

U. S. Education. Among DAY students, whites are most likely to Indicate they have received a Baccalaureate degree or higher (12.4%) followed by Japanese 10.9% and Native Americans (6.6%) all the other groups have less than three percent in this category. The modal response is, also, High School diploma (60%).

Within the EVENING division, Whites (40.4%) also rank with Japanese (41.8%) students with the highest percentage of students who have completed a baccalaureate degree or higher. Most of the other evening White students indicate High School Diploma (36.8%) as the highest level of completion.

Foreign Education. After Blacks (5%), Whites (7.6%) are the least likely of any DAY group to indicate having received their highest diploma or degree abroad. The other groups range from 12.5% for Hispanics to 35.9% for Southeast Asians. White (5.1%) and Black (2.7%) students in the EVENING division are also least likely to indicate having received their highest diploma or degree abroad.

Job Situation. Regular full-time (29.6) and part-time (28.2%) work account for most (57.8%) of the responses on the Job Situation item among DAY White students. Another quarter of these respondents indicate they do not work but are either full-time (14.3%) or part time (10.6%) students.

In the EVENING, these students (5.7%) and Japanese (4.2%) are least likely to indicate they are students only and the most likely to indicate they have regular full-time work (White 80.8%; Japanese 79.2%).

Main Problem. DAY White students are the most likely to indicate they anticipate No Problem (50.5%) that might affect their ability to complete the semester. Of those who do indicate problems, the most frequent responses are Work Conflicts (13.6%), Financial Problems (10.2%), and Study Habits (9.2%).

Among EVENING students, 57.1% indicate No problem, 27.1% indicate possible Work Conflicts, and the remainder (15.7%) are dispersed across the other 6 options.

HISPANICS

Enrollment Patterns

Fifty-two percent (52.1%) of this DAY group enrolled in between 10 and 15 units Fall 1988. The modal response for Hispanics was 10-12 units (29.5%). Most Hispanic EVENING students enroll in 3 or less units (42%); 32.9% enroll in 4-6%; 15.9% enroll in between 7-9 units and the remaining nine percent (9.2%) enroll in 2n or more units.

Twenty-eight percent (28.1%) of DAY Hispanics have completed no prior units at City College. Among evening students the comparable figure is 25.5%.

Response Patterns

Seventy-five percent (75.2%) of these DAY students indicate they have met with a counselor to discuss and develop an educational plan, 15.1% indicate they have not, and 9.7% indicate the intention to do so. In the evening only 31.7% have met with a counselor for this purpose. This is about the same as the rate for Black EVENING students (31.9%) and compares fagorably against Japanese (18%), Southeast Asian (19.3%), and White (19.5%) students who have a lower rate of affirmation on this item.

Transportation. Most Hispanic DAY students arrive to class as automobile drivers (42.4%), 37.5% use MUNI, and 9.9% use BART—This pattern is consistent with evening Hispanics as well. Fifty-eight percent (57.8%) of the solvine, 24.2% use MUNI, and 6.8% use BART to get to class.

Lower Fees (^4%) and Special Program (23%) appear to be equally important to these DAY students when asked to indicate the Main Reason they selected CCSF. For Hispanics enrolled in the evening, Lower fees (30.6%), Special Program (24.1%), and CCSF Reputation are the three highest ranking options selected. It should be noted that among all EVENING students, Hispanics are most likely to endorse the reputation of City College.

Transfer (57.4%) and Two-Year Program (15.3%) lead Hispanic DAY responses to the question asking students to indicate their **Main Educational Goal**. In the evening, Transfer (33.1%) is followed by Personal Interest (18.7%), and Two Year Program (11.8%).

Hispanics (40.6%) tie with Chinese (40.8%) students for fourth place among all DAY respondents (after Native American 53.1%, Southeast Asian 44.4%, Other Asian 42.7%) who indicate they are the First In Their Families to Attend College.

EVENING Hispanics, are not much different from their day counterparts on this item: 42.7% indicate they are First to attend College, 55.7% are not, and 1.5% do not know.

U. S. Education. Sixty-six percent indicate their highest U.S. diploma or degree received is a High School Diploma and only two percent have received a bachelor's degree or higher. Twelve and a half percent indicate they have received their highest degree in a foreign country.

For EVENING Hispanics 21.5% of respondents have indicate a high school diploma is their highest U.S. diploma or degree received. Tweive percent (12.4%) have earned a bachelor's degree or high pr, and 19.9% indicate that they have earned their highest degree or diploma in a foreign country.

Job Situation. Hispanic DAY students are as likely to be regularly employed full-time (27.1%) as they are to be working part-time (27.1%). Only one-quarter (25.6%) indicate they are non-working students (15.2% full-time students and 10.6% part-time students).

Hispanic EVENING students are more likely to be employed full-time (72.9%) than Southeast Asians (52.8%), Other Asians (57.7%), Native Americans (58.5%), Chinese (62.9%), and Filipino (69.3%) evening students, but not at the rates of White (80.8%), Black (75.1%), or Japanese Students (79.2%).

Main Problem. Forty percent (40.3%) of Hispanic DAY studentsindicate they anticipate No Problem that might affect their ability to complete the semester. Of those who do indicate a problem, Work conflicts (12.3%) ties with Study Habits (12.4%) as the leading problem. Financial Problems follow with 10.3% of the cases.

Most EVENING Hispanic students anticipate NO Problem (47.5%) completing the semester. Of those who do indicate a problem, most are concerned with potential Work Conflicts (22,7%).

Regarding Primary Language spoken at home, fifty-nine percent of Hispanic DAY students indicate Spanish, 38.3% English, the remainder (2.7%) indicate other languages. In the EVENING, more Hispanic students indicate English (44.9%) is their primary language. Fifty-three percent indicate Spanish, and 2.2% indicate other languages.

CHINESE

Enrollment Patterns

Chinese DAY students are similar to Southeast Asians and Other Asian D. / students in that these groups tend to have more students enrolled in the higher unit bands (beyond 12 units) than do the other ethnic groups.

Semester	Units:	DAY	Respondents
----------	--------	-----	-------------

	=<12	13-15	=>16	Total
Black	64.8	23.8	11.4	100.0
White	67.2	21.3	11.5	100.0
Hispanic	67.3	22.6	10.0	99.9
Chinese	49.4	32.9	17.6	99.9
Filipino	58.8	25.5	15.7	100.0
Japanese	66.4	22.1	11.5	100.0
S.E. Aslan	49.2	31.3	19.5	100.0
Othr Aslan	51.7	30.5	17.6	99.8

These three groups of DAY students also are most likely of all groups to have attended Summer School just prior to Fall 1988: Chinese (31.7%), Southeast Asian (29.2%), and Other Asian (34.1%). Least Likely to have attended CCSF summer 1988 are Whites (23.8%), Hispanics (24%), Filipinos (24.5%), and Blacks (25.5%).

Among EVENING students, enrollment patterns are less distinctive. Approximately three-fourths of all all groups are enrolled in six or less units.

Response Patterns

Transportation. Chinese DAY students are not as likely as other groups to arrive at class by driving (32.8%). At 59% they have the highest rate using public transit (46.1% MUNI and 13.3% BART), followed by Southeast Asians (54.9%), Blacks (53.7%), Hispanics (47.4%), Other Asians (45.7%), and Native Americans (45.6%). At 38%, Japanese and Whites are least likely to use public transportation to day classes. EVENING transportation patterns of Chinese respondents are similar to those of other groups.

For this group, Lower Fees (27.3%) are the most important reason they select City College. The rationale of almost fifteen percent (14.8%) however is unavailable to us because they select "other". Fourteen percent (14.1) selected City College because they were ineligible for CSU/UC (an additional 5.2% indicate their first choice was denied). Thirteen percent (13.2%) indicate Special Programs. EVENING responses to this item are similar to those of other ethnic groups: Lower Fees (35.2%), Special Program (21%), "other" (22.7%), with Reputation at 7.5% and the other options trailing far behind.

Almost 70% of Chinese DAY students have Transfer as their main aducational goal. This is the highest endorsement of any group and is followed by two-year program (8.5%). Among EVENING students in this group, Personal Interest (35.6%) ranks first, Transfer (20.8%) second, and Advance in Occupation (8.7%) third.

Family College Attendence. Forty-one percent (40.8%)of the Chinese DAY respondents indicate they are first in their family to attend college. On this item they tie with Hispanics (40.6%) for third place behind Other Asians (42.7%) and Southeast Asians (44.4%). In keeping with the generally higher levels of education among all EVENING students, fewer Chinese students indicate they are the first in their families to attend college (34.5%).

U. S. Education. Regarding the highest degree or diploma received in the U.S., 58.9% of Chinese DAY students indicate High School diploma, 3.6% indicate a bachelor's degree or higher, and a quarter (25.8%) indicate their highest degree or diploma was received in a foreign country. At 21.5%, Chinese students are among the least likely (after Southeast Asians [16.1%])of all EVENING respondents to indicate completion of a High School diploma. They fall in-between Hispanics (12.4%) and Japanese (41.8%) respondents with 33% indicating they have earned a bachelor's degree or higher.

Job Situation. Native Americans (43.8%) and Asian students are the most likely of all DAY students to be non-working full-time students. Twenty eight percent (28.1%) of Chinese, 27% of Japanese, 33.1% of Southeast Asian, and 31.3% of Other Asians fall into this category. Twelve percent (11.6%) of Chinese day students are non-working part time students.

In the EVENING, Chinese (62.9%) respondents are not as likely as Whites (80.8%), Japanese (79.2%), Hispanics (72.9%), or Filipinos (69.3%) to have regular full time employment. But they do rank higher than Other Asians (57.7%), Southeast Asians (52.8%), and Alaskan Natives/Native Americans (58.5%) on this option.

Main Problem. Among DAY students, Native American (25%), Southeast Asian (27.1%), Other Asian (32.4%), and Chinese students (33.4%) are *least* likely to indicate None in response to this item. Chinese students who do indicate problems rank reading and writing first (21.8%), Study Habits second (10.4%), Speaking Skills (8.7%) and Work Conflicts (8.2%) third, and Financial Problems close behind (7.7%). In the EVENING, they are consistent with the other ethnic groups in selecting None most often (42.9%). However, they are most likely of any group to indicate Work Conflicts (35.5%).

Primary Language Spoken at Home. Day Chinese respondents are somewhat different from EVENING respondents on this item.

	Day	Evening
Cantonese	62.8	53.3
Mandarin	8.3	6.6
English	23.1	34.6
Other	5.8	5.5
Total	100.0	100.0

FILIPINOS

Enrollment Patterns

One quarter (24.5%)of the Filipino DAY respondents attended Summer School at CCSF just prior to the Fall 1988 term. A third (33.8%) were continuing students from the prior Spring term, 28.8% were new to City College, and the remainder (13%) were returning after a lapse of at least one semester.

In the EVENING, 38.2% were continuing from the Spring term, 19.1% from the Summer term, 20.4% were new, and the remainder (22.5%) attended some time before Spring 1988.

See table comparing DAY and EVENING semester units of all ethnic groups under Chinese profile.

Response Patterns

Developing An Educational Plan. As indicated earlier, Filipinos are the most likely of all DAY students to affirm this item. Eighty percent (80.4%) indicate they have met with a counselor or advisor to develop an educational plan. In the EVENING, Filipinos are not highest, but at 33.6% Yes, they also rank among the highest affirming this item.

Transportation. Filipino DAY students are as likely to Drive themselves to class (42.9%) as they are to use public transportation (42.8% when MUNI [36.7%] and BART [6.1%] are combined). EVENING behavior follows the general evening pattern: 60.2% Drive themselves to class, 28.2% use public transportation, five percent (5.2%) arrive as passengers in other persons automobiles, and the remainder use other modes of transport.

Why City College? Lower fees (29.2%) is most likely to be endorsed by these DAY students. followed by Special Program (17.6%) and Other (17.1%), CCSF Reputation (9.8%), Ineligible to attend CSU/UC (9%), and to Live at Home (8.7%). These responses are consistent with the Age Distribution of all ethnic groups provided at the beginning of this section which indicates Filipinos have the highest percentage of respondents at the youngest age category (19 years of age and younger).

As is the case with other EVENING students, Filipinos rank Lower Fees first (33.3%), Special Program second (24.5%), Other (19.3%) third and CCSF Reputation (12.3%) next.

Educational Goal. Two-thirds of the Filipino DAY students have Transfer to a 4-year institution as their educational goal. Fourteen percent (13.7%) indicate a Two-Year Program is their goal and the remainder of the responses are distributed across the other 8 options with none receiving more than 4.7%.

In the EVENING, Filipinos are similar to Black (34.7%), and Other Asian (33%) respondents in being more likely than the other groups to select Transfer as an educational goal. Filipinos differ somewhat from the other evening students in that only 17.3% of indicate Personal Interest as an educational goal. That is half the proportion of Chinese students who indicate personal interest and most like the response of Hispanic evening students (18.7%).

U.S. Education. Consistent with other DAY groups (and with their youthful age profile), Filipino students are most likely to indicate that the highest diploma or degree they have completed is a High School Diploma (62.5%). Only two percent (1.9%) indicate completing a bachelor's degree or higher and 22.1% indicate receiving their highest degree or diploma in a foreign country.

In the EVENING, Filipinos are more likely than any of the other ethnic groups to indicate that they received their highest degree or diploma abroad (36.1%). Almost thirty percent (29.7%) indicate a High School diploma is their highest degree received, and only eight percent indicate having received a bachelor's degree in the U.S.

Foreign Education. Among DAY students, Filipinos (7%) rank third to Japanese (15.1%) and Southeast Asians (11.6%) in the percentage who have received bachelors degrees or higher in a foreign country. Among EVENING students, Filipinos are most likely to indicate they have received a bachelor's degree or higher abroad (29.8%). As is the case for DAY students, Southeast Asians are second among evening students (22.3%).

Job Situation. Filipino DAY students fall toward the lower end of the range when it comes to Full Time Student status. Only 17.7% select this option which is above Whites (14.3%) and Hispanics (15.2%) but below every other DAY group. Only nine percent of Filipino DAY students (8.7%) are Part Time Students Only. The moday response for this group on this item is Regular Part time Vork (27.9%), followed by Regular Full-Time Work (23.3%). In the EVENING, 69.3% have Regular Full-Time Work, 10.5% have Occassional Full Time Work, 5.7% are Full-Time Students Only, and 3.6% are Part-Time Students Only.

Main Problem. Forty-one percent (40.5%) of Filipino DAY students indicate No Problem threatens their ability to complete the semester. Among those who do indicate a problem, Study Habits (16.6%) and Work Conflicts (15.6%) lead the selections. In the EVENING, 35.5% of Filipinos indicate No Problem (which is the highest of any group), 42.9% indicate Work Conflicts, and the remainder are distributed across they other options with Study Habits receiving 5.5% and Financial Problems 4% of the selections.

C. STUDENT SERVICES

1. DAY AND EVENING COMPARISONS

GENDER. As indicated in the graph on the bottom of the next page, in the DAY division, men are consistently more likely than women to indicate they never heard of any of the listed student services. Women's rate of knowledge and intended use is higher than that of men for every service category except Student Activities and Gay Lesbian Services. The largest differences in intended use are found for the Health Center (34.4% vs. 28.1% for men), Women's Re-entry¹ (10.8% vs. 4.8 for men), and Child Care (11.6% vs. 5.1%).

In the EVENING division (not shown), intended use is more evenly distributed between men and women except for the Wonien's Re-entry program where three and a half times as many women indicate they will make use of this service, the Career Center where 26% more women than men intend to use services, and Academic Counseling where 16% more women than men intend to make use of the service.

KNOWLEDGE OF SERVICES. As the graph on the following page indicates DAY students have a knowledge advantage over EVENING students—fewer indicate they have "Never Heard Of" services. The category with the narrowest difference in knowledge and intended use between day and evening respondents is Gay/Lesbian Support Services where 4.3% of the evening students and 5.2% of the day students know about the service and intend to use it. In every other category of service, day students are both more aware of the services and indicate they intend to use them to a greater extent than evening students.

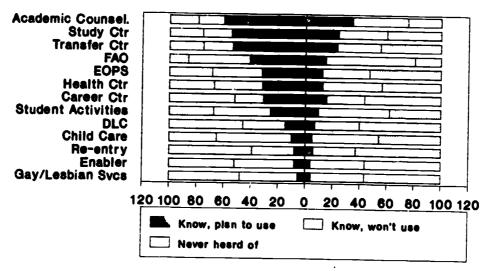

RANK ORDER OF INTENDED USE. The next set of graphs indicate that the rank order of the top three student services is the same for day and evening respondents and varies only slightly after that. The only striking difference between day and evening in the rank order of services students intend to use is the position of Career Center.

Consistent with the importance of occupational options described in the prior discussion of Job Situation, evening students rank the services of the Career Center fourth (after Academic Counseling, Study Center, and Transfer Center) but for day students Financial Aid ranks fourth. This is also consistent with the depressed household income levels reported for day students (vis a vis evening household income).

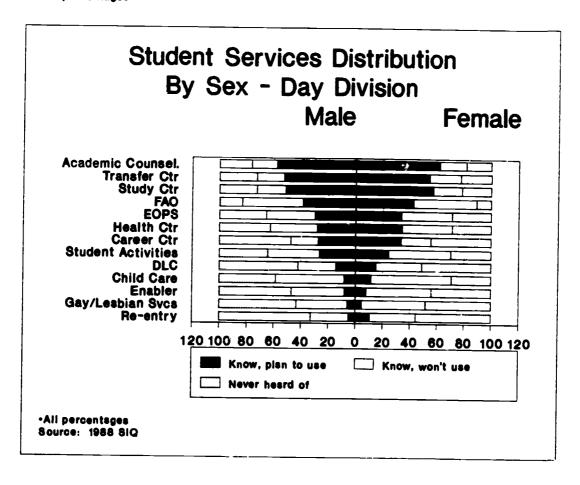

¹ At the time of the survey, this program was directed to women. Since then, the services have been reorganized to serve both men and women. The new name is Re-entry Program.

1988 SIQ Student Services Day Evening

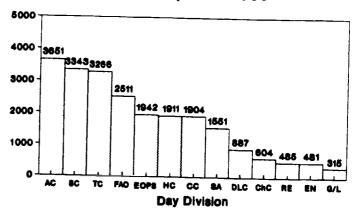

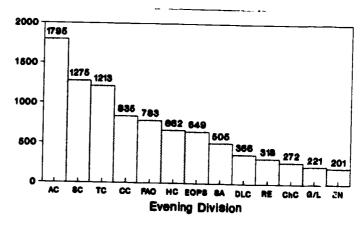

All percentages

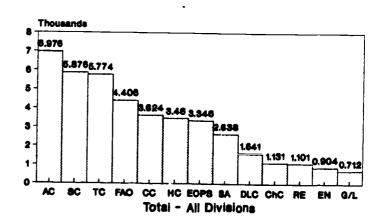

1988 SIQ Student Services Know plan to use

Note: Rank order of services students "know about and plan to use" varies with division.

Key: AC (Academic Counseling); SC (Study Center); TC (Transfer Center); FAO (Financial Aid Office); CC(Career Center); HC (Health Center); EOPS (Educational Opportunity Programs and Services); SA (Student Activities); DLC (Diagnostic Learning Center); ChC (Child Care); RE (Women's Re-entry); EN (Enabler Services for Disabled Students); G/L (Gay and Lesbian Support Services).

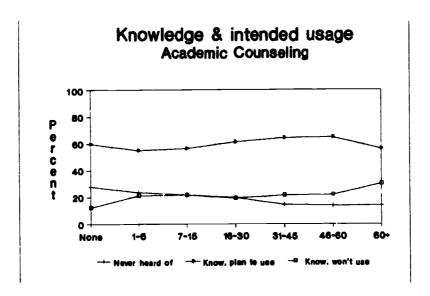

2. DAY STUDENTS: STUDENT SERVICES AND UNIT COMPLETION

The series of graphics that follow summarize the effects of time and experience on knowledge of and intended use of student services. The presentation is limited to day students because for the most part, access to these services is severely limited for evening students.

In each instance (the graphs are presented in high-abetical order on the next three pages), s. dents are less likely to indicate they have "Never Heard Of" a service as their cumulative unit load increases (see line with a single hatch mark).

The curve and level of lines representing the option "Know and Plan to Use" (the line with asterisks) varies with type of service. Recall that Academic Counseling, Study Center, and Transfer Center consistently rank highest (in that order) for Day, Evening, Men, and Women respondents.

The lines representing the option "Know and Won't Use" (line with boxes) provide another indication of the level of swareness. For example, although Child Care and Enabler pertain to restricted groups (one must have children or be physically disabled to qualify for these services) all day students become more aware of these services as they accumulate units. This should encourage service providers because non-users may also serve as "networkers" who share information about the availability of services with potential clients.

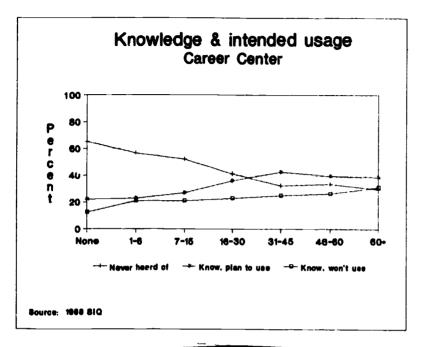

intended Use. The "plan to use" curve for Academic Counseling starts at sixty percent of all day respondents and peaks at just a few percentage points higher in the 48-80 unit category, indicating a fairly consistent pattern over units earned.

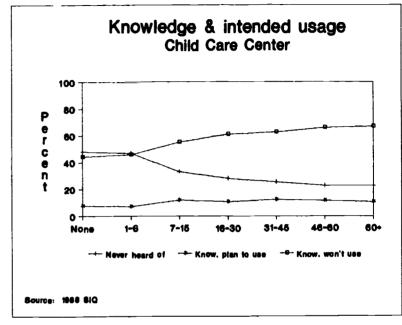

New students ("none" on the units completed scale) actually have a slightly higher intent to use the Study Center than do students enrolled in 1-6 units. The line climbs, peaking at 60% at the 16-30 unit category. Intended usage remains fairly stable, dropping very slightly as units increase.

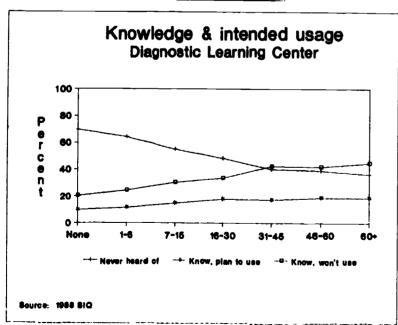

Students clearly become more concerned about Transfer as they accumulate units. About 38% of students with six or less units express the intent to use the Transfer Center and this figure climbs steadily, peaking at the 46-80 unit category. Past that point, intended use drops to about 57%.
